ePublishing Drives Maximum Profit For Publishers

Our software and services empower a range of business models, diversified income streams and deep reader engagement by integrating behavioral data with Contextual Content, Community & Commerce.

Purpose-built for Publishers

More revenue with less effort. Enterprise Publishing System combines content management (CMS), audience management/CRM, actionable deep data, workflow, community, video, events, directories and eCommerce.

No More Silos

Integrate your existing systems; circulation, fulfillment, email provider, webinar, Salesforce automation, accounting and more. Unlock the power of more simplicity, seamless data and better reader alignment.

Revenue Per Reader

Leverage reader behavior to drive more revenue. New lead generation, sponsorship and sales opportunities with automated topic pages, buyers guides, directories, classifieds, galleries, events, eCommerce and more.

| Content | Community | eCommerce | User Management | Workflow | SEO | 24/7 Support | Mobile |

Add Editorial Efficiency
A powerful dashboard and Digital-First Workflow: Create content once and deploy to multiple channels: web, mobile, tablet, InDesign, blogs, eNewsletters, events, multimedia, directories.

Engage Your Audience
Engage your readers; drive visits, time-on-site & ad revenue with automated context, social media, user-generated content, topic pages, ratings, related content, comments, forums.

Make More Money
Increase your revenue; present offers in context with related content, events, listings, products & subscriptions, using one secure, PCI-compliant shopping cart.

Manage Audience Data
Sell more ads, build circulation, target marketing and launch new products with a complete view of audience; purchase history, content preferences and individual user behavior.
